SPECIFIC INSTRUCTIONS

Item No. 1 A. - D. Provide all requested information about the facility producing the discharge of wastewater, even if the wastewater is only from bathrooms and break rooms.

Item No. 2 A. Manufacturing or Service Activities Conducted & Final Products. NOTE: State what kind of business, i.e. sales; rental; repair; etc.

C - D. Provide a listing of all primary raw materials and chemicals used in the facility's operations. If trade names are used, provide information regarding the active ingredients. Where available provide material safety data sheets (MSDS).

D. List each process, the production rate (i.e., 10,000 lbs. of (product name per year), and the SIC code for each process.

Item No. 3 A. Provide the total plant flow rate (average and maximum) to the sanitary sewer in gallons per day (gpd). If accurate flow measurements are unavailable, provide the best estimate.

B. Provide a breakdown of the sources of the total plant flow to the sanitary sewer including process flows, sanitary wastewater, cooling water, etc. Also indicate the flow rate (gpd) and the type of discharge. A batch discharge is a discharge in which the wastewater is stored in a tank and the tank is emptied at one time. A continuous discharge is one in which the quality of the discharge may change during the day. The average daily flow is the total flow for a month divided by the number of days in the month for which there is a discharge.

Item No. 5 A. This report should be signed by an authorized representative as defined by 40 CFR 403.12(l), for any type of business, even if the flows are only domestic.
