The provision of safe water, sanitation and safe hygiene play an essential role in protecting human health during infectious disease outbreaks, including COVID-19. District staff is working daily to continue to provide service to our customers. According to the CDC, the COVID-19 virus has not been detected in drinking water, and water treatment methods that use filtration and disinfection, such as those used by the District, should remove or inactivate the virus that causes COVID-19.

Please help the District prevent blockages at your property at the District system. Dispose of the following items in the trash, not in the toilet: wet wipes, sanitary items, rags and baby wipes.

Thank you for your cooperation
